

April 25, 2019

Fellow Stillwater Valley Landowner,

Since 2011, the Stillwater Valley Watershed Council has offered landowners in the Stillwater Valley a unique opportunity to join your neighbors, both public and private, in an on-going effort to control noxious weeds and protect the natural ecosystem throughout the watershed river corridors. In 2019, the SVWC will continue the "top-to-bottom" approach at weed management.

This year, the SVWC will maintain the incentive of coordinating commercial applicators for participants in order to increase the efficiency and decrease the hassle and overall expense to landowners. However, with the foreseen decline in grant funding available for the Cooperative Weed Control Program (CWCP), the SVWC is only able to cost-share chemical for initial landowner signups but will continue to provide the coordination and oversight efforts for all program enrollees.

**With your membership of \$35 to the Stillwater Valley Watershed Council, and pre-payment of \$85, we are offering you the following opportunities:**

- ◆ **Coordinate commercial applicators to perform chemical applications for noxious weed control;**
- ◆ **Cost-share chemical expenses for first year program enrollees;**
- ◆ **Provide on-site weed control consultation, when requested;**
- ◆ **Provide an educational campaign, providing management tools necessary to successfully maintain a weed-free area. *FYI, SVWC's June 8th Spring Forum (Cobblestone in Absarokee) will include topics such as controlling weeds on small acreages, riparian area health as well as chemical updates and sprayer calibration.***

The estimated cost of this project is \$135/hour which includes chemical and associated contracted services. Depending on the terrain and weed infestation level, it is estimated that one hour of application time will treat one acre. A prepayment of \$85, with your annual membership of \$35, will be collected prior to the CWCP, which will begin in mid-June in areas north of Absarokee (to Columbus) and in mid to late July around the south end of the watershed (Nye, Roscoe, Fishtail and surrounding areas). If any additional control measures are required over one hour of application time, the cost will be billed to the landowner at a rate of \$85/hour plus the cost of chemical. Again, project coordination and oversight is covered by the SVWC.

Landowners will be accepted for this program on a first-come, first-serve basis with an application deadline of June 15th. If you are unsure if noxious weeds are present on your property, please contact Lindsey and arrangements can be made to assess your property prior to making any weed control commitments.

STILLWATER VALLEY  
WATERSHED COUNCIL

PO Box: 112  
Absarokee, MT 59001

For those of you that are long-time participants of the CWCP, we truly appreciate your dedication to the control of noxious weeds in our watershed and support of this program! Hopefully by this time, the SVWC has given you the tools and contacts needed to take care of your noxious weed concerns. Therefore, we encourage you to begin to think about controlling your own infestations if you are willing and able in order for the SVWC to focus fiscal efforts on those landowners that do not yet have these tools.

No matter your weed control plans for the year, please remember that we must all take responsibility for managing our property to keep the Stillwater Valley from being infested with noxious weeds. According to the Montana Local County Weed Act (7-22-2116), it is unlawful for any person to permit noxious weeds to propagate or go to seed on their land. Additionally, the longer aggressive control measures are postponed, the more these control measures will cost; resulting in increased environmental problems and devaluation of property.

***If you are interested in taking advantage of this coordination effort, please complete the enclosed form and return it to us by June 15th.*** A fill-in application can also be completed on SVWC's website at [www.StillwaterValleyWatershed.com](http://www.StillwaterValleyWatershed.com) under the section "About the SVWC" then "Weed Control". Please contact our Coordinator, Lindsey Clark, at 406-780-1249 for more information; inquiries can also be sent to [SVWC2010@hotmail.com](mailto:SVWC2010@hotmail.com).

Sincerely,

Board of Directors  
Stillwater Valley Watershed Council
